

What Students Are Saying!

Vicki is very enthusiastic about quilting and teaching. I learned a lot and hope to use the sky technique often in my quilts

I highly recommend this class as it is very well taught by Vicki. Her instructions are clear and well illustrated in the class demos. By making a small sample, we are able to practice all aspects of the project and be able to use it as a reference , after class . Jan Soules

Fun techniques that you can use for much more than landscapes. Taught me to look at large spaces rather than focus on too much detail, which is what landscapes are all about. Vicki Conley's class was a wonderful experience! She has simplified a process to produce amazing results for even a novice! I am excited to apply these techniques to a new project soon.

Thank you, Vicki, for your thoroughness in working with each of us to get such success in our projects. This class was exceptionally valuable in that it included several different quilting techniques including applique, paper piecing and topstitching the quilt top. In addition, Vicki Conley has an eye for color, composition, and perspective that was tremendously helpful for someone new to landscape quilting. I highly recommend this class or any other that Vicki teaches.

Vicki clearly teaches her method step by step using a small sample, before her students attempt a large composition. This gave me confidence and Vicki patiently answered any of our questions as we progressed. I came out of Vickie's class with genuine excitement about my project. Future projects are buzzing in my mind already because the results from her technique give such unique imagery. Marion Emerson at Empty Spool Seminar '23

If you can trace it, you can make it - perfectly. Go for as much detail as you like, or abstract your image, or whatever you like; this method will work!
